

# VILLANOVA'S VISIONARY MASTER PLAN

Villanova College is built on strong traditions, but we also seek to embrace the future. This is why, starting from April 2019, the school will begin Stage One of a five-part Master Plan that will mark the school's most dramatic transformation in its 70-year history. With this Master Plan, Villanova College is embracing the future by building new learning spaces designed for 21st-century education.

## STAGE ONE 2019 – 2020

The first stage of the Master Plan includes construction of a new three-storey building. This building will provide a new Junior School precinct, additional classrooms for Senior School students and direct access to the green space of Whinstanes. Stage One will also include the development of the College's playing fields at Tingalpa, Villanova Park. This will include construction of a new grandstand and change facilities.

## STAGE TWO 2021 – 2022

Stage Two sees the remodelling of Goold Hall to provide additional capacity for the whole of College celebrations. It also marks the creation of a new Middle School precinct as Middle School students take ownership of refurbished O'Donnell and Good Counsel classrooms. Through the support of the community, a new Cor Unum Centre, containing flexible learning and function space will also emerge at Villanova Park.

## STAGE THREE 2024 – 2025

In Stage Three, two buildings will be demolished to create a new main entrance and allow the historic building of Langlands to truly shine. A new campus-wide corridor will be created spanning Fifth Avenue down to Main Avenue. Stage Three also includes transforming Mendel Hall into a new Science, Technology and Engineering Centre.

## STAGE FOUR

An indoor double court stadium, including a multi-level car park and new service facilities along Main Avenue, forms the centrepiece of this stage.

## STAGE FIVE

An Arts precinct will be created to house performing and creative arts in one central facility.
